Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from *The Laws of Algebra, an Elementary Course in Algebraic Theory* It has long been acknowledged that there is great need of an elementary account of the Laws of Algebra suitable for use in the senior classes of schools. The object of this little book is to meet that need: it makes, therefore, no pretence of expounding new ideas, but aims at a clear and simple statement of the rudiments of algebraic theory. The recognised methods of teaching algebra in schools assume rightly that Formal Algebra and the Theory of Numbers are university subjects and quite beyond the mental range of the school boy. For this reason the various principles involved in algebraic methods are either demonstrated empirically or justified by various illustrations mostly of a geometrical nature. In dealing with beginners this is inevitable. The danger is that the fundamental principles may remain for ever buried under the illustrations or distorted by irrelevant considerations. Many schoolboy will - with the full approval of his conscience - prove that $a(b + c) = ab + ac$ from Euclid II. 1, and vice versa. Pure algebra is independent of geometry and at some period in the school career this ought to be emphasised by instruction in the elements of algebraic theory. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be...
