Special Interest Model Books, United Kingdom, 1998. Paperback. Book Condition: New. 206 x 142 mm. Language: English . Brand New Book. Over many years in a workshop, the knowledge and ability to perform a wide number of relatively minor jobs becomes second nature to a skilled engineer, but the amateur, no matter how great his natural talent, rarely has the opportunity to experience the same wide range of tasks. This book, by the experienced engineer Ian Bradley, contains useful advice and instruction for beginners on workshop practices including arbors and mandrels, belt jointing and splicing, shaft collars, finishing metal surfaces, G-clamps, surface gauges, cutting holes, special nuts, hand turning tools, the wobbler, case-hardening, and machining square material. This book was suggested to the author by his many readers and correspondents as a supplementary volume to his classic textbook The Amateur s Workshop.
