

Big Science and India (Paperback)

Filesize: 8.88 MB

Reviews

An extremely awesome publication with lucid and perfect explanations. It is actually written in basic phrases rather than confusing. You will like how the writer publishes this book.

Createspace, United States, 2012. Paperback. Book Condition: New. 216 x 140 mm. Language: English . Brand New Book ***** Print on Demand *****.On 4 July 2012 Director-General Rolf Heuer of CERN (European Organization for Nuclear Research, Geneva) made an announcement about the discovery of a particle consistent with the long-sought Higgs Boson. According to the theory given 45 years ago we have an explanation as how matter acquires its mass. It involves this boson. Since then there has been a determined chase to track it down in the laboratory. Experiments carried out by two teams using the Large Hadron Collider (LHC) at CERN statistically confirm the predictions. It s really an incredible thing, exclaims Higgs himself, and Heuer adds his congratulations to everyone involved in this achievement. In the introductory remark he said, It was a global effort, it is a global effort, it is a global success. This essentially sums up the new scientific culture that has come to us in the wake of the Second World War where Science has become Big in which have joined all the major segments of the Society in a global way. This is an altogether new and welcome phenomenon in the long history of mankind and actually it is that we celebrate in such a pursuit, a pursuit founded on the principle of empirical rationalism. But what are bosons? They are entities which mediate between material particles, are associated with interactions between masses. There is matter, there are interactions. Those particles which follow Fermi-Dirac Statistics are called Fermions; those that follow Bose-Einstein Statistics are Bosons. This was some 80-90 years ago. The question that is to be asked then is: In the material creation are these two separate entities, Fermions and Bosons? Or is there something yet higher from which the two...
