

Baseline Assessment and Prioritization Framework for Ivhm Integrity Assurance Enabling Capabilities

Filesize: 9.76 MB

Reviews

It is really an awesome pdf that I actually have actually study. It really is basic but excitement from the 50 % of the publication. I am delighted to inform you that here is the greatest book i have read through within my individual existence and can be he finest publication for actually.
(Mrs. Yasmine Crona)

BASELINE ASSESSMENT AND PRIORITIZATION FRAMEWORK FOR IVHM INTEGRITY ASSURANCE ENABLING CAPABILITIES

To save **Baseline Assessment and Prioritization Framework for Ivhm Integrity Assurance Enabling Capabilities** eBook, please refer to the link beneath and save the document or get access to additional information which might be have conjunction with BASELINE ASSESSMENT AND PRIORITIZATION FRAMEWORK FOR IVHM INTEGRITY ASSURANCE ENABLING CAPABILITIES ebook.

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 26 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Fundamental to vehicle health management is the deployment of systems incorporating advanced technologies for predicting and detecting anomalous conditions in highly complex and integrated environments. Integrated structural integrity health monitoring, statistical algorithms for detection, estimation, prediction, and fusion, and diagnosis supporting adaptive control are examples of advanced technologies that present considerable verification and validation challenges. These systems necessitate interactions between physical and software-based systems that are highly networked with sensing and actuation subsystems, and incorporate technologies that are, in many respects, different from those employed in civil aviation today. A formidable barrier to deploying these advanced technologies in civil aviation is the lack of enabling verification and validation tools, methods, and technologies. The development of new verification and validation capabilities will not only enable the fielding of advanced vehicle health management systems, but will also provide new assurance capabilities for verification and validation of current generation aviation software which has been implicated in anomalous in-flight behavior. This paper describes the research focused on enabling capabilities for verification and validation underway within NASA s Integrated Vehicle Health Management project, discusses the state of the art of these capabilities, and includes a framework for prioritizing activities. This item ships from La Vergne,TN. Paperback.
